Live Pure by BOEN

YOUR STYLE · YOUR FLOOR

Wood in its
most beautiful
form.

Wood is a fascinating material: authentic, warm, lively and beautiful but also extremely robust. As hardwood flooring, it's made for being a part of everyday life while still remaining beautiful. With our innovative Live Pure surface treatment, its resistance is only strengthened – and in an almost invisible way.

LIVE PURE: THE BENEFITS AT A GLANCE

- *Innovative surface technology*
- *Looks like untreated wood*
- *High abrasion resistance and chemical resistance*
- *Easy to care for*
- *High UV stability*

Tangible

If you choose a wooden floor, you're choosing to have a piece of beautiful nature in the house. The structure, the typical grain, the fine surface of the wood, the authenticity – all this should be tangible. And all this should be protected. This is exactly what Live Pure does. Its innovative recipe and ten layers of intensive application ensure that Live Pure is massaged into the smallest of pores in the wood. This means that no dirt can permeate into them. The result is an extremely hard-wearing wooden floor with improved protection against wear and tear, scratches and stains (EN13442).

Visible

Thanks to Live Pure, the natural colouration of the wood caused by exposure to light is also much less pronounced when compared to all other BOEN surfaces. The gloss level is also two to three times lower than with standard coatings. Live Pure is also an environmentally-friendly surface treatment with extremely low emission levels. The result: a floor whose wooden look remains ultra-matt and authentic and in the non-dyed version looks like it has been freshly sawn.

Easy to care for

Live Pure is the perfect protection. Almost invisible and yet resistant against dirt, dust and liquids. We recommend using our Polish Live Pure to care for it if necessary. You can find more information on this in our cleaning and care instructions or at [boen.com](https://www.boen.com)

As varied as your wishes: our Live Pure collection
